SUMMARY

Entry-level software engineer with strong problem-solving skills, solid CS fundamentals, and hands-on project experience. Quick learner with the ability to understand requirements and deliver clean, reliable code. Seeking an opportunity to contribute to real-world software development while growing my skills.

SKILLS

- **Programming Languages** : Java, Python, C++
- **Frameworks** **:** Spring Boot, Spring Security, Hibernate, JPA
- **Databases** : MySQL, PostgreSQL.
- **Security & Gateway** : Keycloak, Kong API gateway.
- **Cloud** : AWS(EC2 – deployment exposure).
- **Architecture** : REST APIs Microservices, Idempotency, Webhooks, Reconciliation.
- **Tools** : Git, Maven, Postman.
- **Core Competencies** : Problem-Solving, RESTful APIs, SDLC, OOP, DSA, DBMS, Design Patterns, Agile.

PROJECTS

Freelance Java Backend Developer

Freelance Project | 2025–2026

Tech Stack: Java, Spring Boot, PostgreSQL, Kafka, Keycloak, AWS EC2

- Owned Backend Components of the payment Services managing transaction lifecycle and processor integrations.
- Implemented idempotent state management to prevent duplicate or inconsistent payment updates.
- Developed reconciliation (Polling) mechanisms for missed or delayed transaction updates.
- Built secure webhook handlers with signature verification and replay protection.
- Integrated service authentication with keycloak for token-based access control.
- Worked with PostgreSQL for transaction persistence, query optimization, and indexing.
- Deployed and validated services on AWS EC2 behind Kong API gateway.
- Developed REST APIs for payment creation and transaction status tracking using Spring boot.

Krishi Mitra – Online Crop Marketplace

Tech Stack : Java, Spring boot, Spring Security, Hibernate/JPA, MySQL, JWT, DTO Validation

Highlights:

- Developed 20+ RESTful APIs for product management, orders, authentication, and weather services.
- Implemented secure JWT-based authentication and role-based access control for farmers, buyers, and admins.
- Applied layered architecture (Controller → Service → Repository) with DTOs and validation for clean code.
- Performedtesting debugging, anderror handling to ensurestable and reliable application behavior.
- Utilized Spring Data JPA with MySQL for efficient CRUD operations on Product, Order, User, and WeatherData entities.
- Optimized database interactions using Spring Data JPA, pagination, and efficient entity mapping.
- Structured the backend as a modular monolith with clear boundaries to ease future migration to microservices.
- Integrated OpenWeatherMap API with scheduled tasks (@Scheduled) to auto-sync weather data for crop planning.
- Collaborated on requirement understanding, testing, and delivery to ensure alignment with business needs.

EDUCATION

Savitribai Phule Pune University, Sinhgad Institute of Business Administration & Research, June 2025
Master of Computer Application (MCA) 7.63 CGPA

Swami Ramanand Teerth Marathwada University, MGM's college of CS & IT Nanded 2022
B.Sc. Computer Science (BSc.CS) 71%

ACADEMIC HIGHLIGHTS

- Organizer, [Sinhgad Spring Festival] – [Sinhgad Institude of Business Administration & Research].
- Managed event logistics, sponsorships, and promotions for the fest.
- Participated in coding and debugging events at college level.
